

August 30, 2009

Dear Kennebunk Fire Company Triathlon Participant,

Thank you to everyone that registered for the Kennebunk Fire Company Triathlon on August 30, 2009. As many of you will quickly see, there are many split times in the results from this triathlon that are missing. Unfortunately, this was due to technical problems of the chip timing system that was used to time the race this morning.

It is very important for Winning Time to explain that the technical issues experienced were in no way the fault of All Sports Events or the Kennebunk Fire Company Triathlon. Every effort was made by Winning Time to thoroughly test all of the components prior to the race, however during the race problems occurred that could not be resolved.

Winning Time would like to offer our deep apologies to everyone that participated, volunteered and helped organize the race. We understand the importance that everyone has in ensuring a great event and know that quality results are part of the experience. We would also like to offer our gratitude to the professional performance of All Sports Events as they were able to provide a full manual back-up of every finisher for this event. Please understand that your finish time is accurate, as are all splits that are available. Missing splits are not recoverable at this time and we are very sorry for the incomplete nature of the results.

Thank you again for your participation and we hope to have your understanding

**Happy Racing,**
